

True Stories of Qigong Healing

CFQ as Meridian Therapy

Master Yap Soon Yeong
and Chok C. Hiew, Ph.D.

True Stories of Qigong Healing CFQ Meridian Therapy

Here is a book about Qigong healing that embraces the essence and significance of human spirituality in the health and healing process. CFQ healing emerges from a human energy-consciousness perspective in Traditional Chinese Medicine. It is a unique yet ageless harmonization method to unify mind, body, spirit and emotions to enhance the self-healing response.

Seven practitioners besides the co-authors write about their dramatic healing stories that unfolded as soon as they embark on their journeys. Their chronic pain, emotional distress, and physical problems melted away as they devoted CFQ healing time to their self-care. Over a brief period (from six months on) disease energy cleared out—even diseases normally incurable with drugs and conventional medicine). The writers contributing to the book are mainly therapists and health professionals and are aware of the limitations of the therapies they routinely use. When they applied CFQ meridian therapy their clients' unsatisfactory level of benefits were breached!
